Features

Stylish and compact design to fit the meeting space

Horizon is more than just a conference speaker. It's a statement piece for your modern workspace. With its sleek and compact design, crafted from premium materials and adorned with a stylish fabric finish, Horizon seamlessly blends into any environment.

Immerse yourself in crystal clear audio and sound quality

No more elbow-to-elbow seating in meetings! The advanced full-duplex speaker system ensures everyone, even those seated in the corner, hears with the utmost clarity. Experience high-fidelity stereo sound with Horizon's high-performance speakers, which offer an exceptional dynamic response and a wide frequency range. Elevate your listening experience to new heights.

Multi-mic array powered by full-duplex and active noise cancellation technologies

Horizon's advanced multi-microphone array system with full duplex technology, equipped with adaptive echo and noise cancellation algorithms, captures every word with remarkable precision within a 5-meter range. Experience immersive communication with 360° voice pickup and 3D spatial processing, eliminating muffled voices and background noise.

Effortless and unique connectivity via three distinct options

Enjoy the convenience of hands-free calling via Horizon's advanced speakerphone. With three versatile modes - Bluetooth, wired USB-C, and the unique USB dongle-based high-speed point-to-point connection you have the flexibility to connect effortlessly in any situation.

A speaker out port and long-lasting battery ensure uninterrupted audio

Enhance your audio experience with Horizon's integrated speaker output port, enabling easy connectivity to external speakers or headphones. The built-in battery ensures uninterrupted performance, making it perfect for extended conferences. Stay connected with Horizon.

Horizon Specifications

		Specifications
Physical Appearance	Material, Finish	Matte finish Grey and Silver ABS with Fabric covering
	Product dimension	160mm x160mm x 38mm
	Net weight / Gross Weight	0.44KG / 0.77KG
	Packaging dimension	221mm x190mm × 55mm
Microphone	Description	Multi- MEMS Microphone Array System uses beam-forming algorithms for precise voice capture
	Pick up distance	5 m Radius Voice Capture
	Response frequency	30-16KHz
	Echo tail length	≥500ms
	Integrated Voice DSP Features	Multi- MEMS Microphone Array System with beam-forming, Automatic Gain Control (AGC), Full-duplex Acoustic Echo Cancellation (AEC), Noise suppression (DNR)
Speaker	Sound Level	95dB
	Response frequency	100Hz-22kHz
Cross Platform Support (BYOD)		Windows 7, Windows 8.1, Windows 10 ; macOS ™ 10.10 or higher, Android
Bluetooth version		V5.0
Battery		Built in 2400mAH
Enviornment	Temperature	Working Temp: 0° to 50°C, Storage Temp: -10° to +60°C
	Humidity	Working Humidity: 20% ~ 80% RH Non-Condensing, Storage Humidity: 10% ~ 60% RH Non-Condensing
Power	Voltage	Voltage: 5 V
